IGNORANCE OF

Declares Lack of Knowledge

st geographical authority, in a lecture | N. ore the Royal Geographical society Problems in Boundary-making "Lack of exact knowledge," he said, N. M. is the rock on which boundary treaies split. Where maps did not exist, and where it was out of the question

The disadvantages of the straight se have been illustrated in several ances lately, notably in boundary isputes in Central and South Africa. in one case an awkward international omplication arose when it was found hat a wide tract of valuable land had een erroneously assigned to England and had to be transferred to Belgium. Then there was the adoption of Gernan Southwest Africa. This entailed years of scientific labor, costing a sum qual to the value of thousands of square miles of useful map-making, e find out where the meridian really

"Absord Incidents arose over the delimitation of the boundary between the United States and Canada. One of the main difficulties arose as to what was meant in the treaty by a main channel. Between Vancouver and the mainland there is an archipelago, and among them at least three channels that might be called 'main hannels.' Chief among these islands Was one called San Juan. In 1859 a pig was shot by an American on San an and the American was haled before a British magistrate and threatened with imprisonment. This put a climax to the dispute. American honwas touched, and troops were nded from both sides. It looked as if the pig incident would lead to war; but the position was saved by arbitration. The award gave the whole archipelago to the United

GERMANS MAKE THREAD FROM ALFALFA STALKS

Berlin, April 18 .- Thread and filient of a practical, usable kind can be made from the stalks of the comon, and in Germany very plentiful. pine, a legume belonging to the al-If family. Two men who have made the discovery after careful investigations, and a captain who has rfected a machine for the process. ave taken out patents, and the Prussin ministry of agriculture has is an appeal to farmers to plant as much lupine as possible this com-

come at this time, when thread is caree. It is the more so since extrements have proven that the best bread from the lupine comes from the mature plant, which means that being culture will not have to be the same of the sa

the mature plant, which means that the lupine culture will not have to be checked, at the expense of the seed, in order to obtain thread. Nor does does him at the lupine culture will not have to be checked, at the expense of the seed, in order to obtain thread. Nor does does him at the expense of the seed, in order to obtain thread. Nor does does him at the expense of the seed, in the least.

Captain von Bluecher's machine, lust invented, can be moved from farm to farm, much as a threshing machine is moved, so that the lupine grown on each estate can be handled there without any transportation difficulties. After the thread material has been extracted from the stalk the remainder is available as straw for bedding, etc.

As a further advantage, the two kinds of lupine prevailing in Germany will grow in almost any kind of soil, but especially in sandy, dry places such as abound in the eastern part of Germany and which can be used for hardly anything else. Beside the thread material from the stalk the transfer of the purchase price of the sale with the sale with the teast with the sale with the sale with the sale with the purchase pr

burdly anything else. Beside the tend material from the stalk, the plants' seeds yield oil, and its roots
